In 1976, a young couple sat in my office at the end of a difficult road. The woman spoke to her husband through tears, "I will never have children." It is for her, and the thousands of other individuals in need of help starting their families, that California Cryobank exists.

-Cappy Rothman, M.D
Co-Founder

www.CRYOBANK.com

ABOUT OUR DONORS

California Cryobank provides the largest and most diverse selection of donor semen anywhere in the world. Whether your donor selection criteria includes education, athleticism, religion, ethnicity, build, skin tone, hair/eye color, blood type, musicality, facial features, or artistry, CCB provides the best opportunity to find the combination that meets all of your personal needs.

CCB donors are recruited from top universities across the country (such as UCLA, USC, Stanford, Harvard, and MIT)* as well as the major metropolitan cities surrounding them. Post-graduate donors include established professionals in various fields including business, medicine, law, and the entertainment industry.

Most importantly, CCB provides quantity without sacrificing quality. Our strict donor qualification process admits less than 1% of all applicants into our program. The use of high educational and physical standards, multiple semen analyses and blood testing, careful evaluation of personal and family medical history, genetic screening, and a series of extensive, in-depth interviews enables CCB to provide the highest caliber donors possible.

CCB recruits donors via internet advertising, information seminars, and university publications. To apply, donor applicants must complete an online application followed by a 3 to 6 month qualification process.

Basic requirements to apply:

- Age 19 to 39
- Enrolled in or graduated from a four-year university
- Minimum height of 5'9"
- In good health

*California Cryobank is not connected or affiliated with, nor endorsed, favored, or supported by UCLA, USC, Stanford University, Harvard University, MIT or any other educational institution. All third party trademarks, including UCLA, USC, Stanford University, Harvard University and MIT are the trademarks of their respective owners.

DONOR QUALIFICATION PROCESS

Every Donation:

Semen analysis
Review any change in health or sexual partners

Monthly:

Test for gonorrhea, chlamydia

Every 3 Months:

Blood draw for infectious disease testing
Update of medical and social assessment

Every 6 Months:

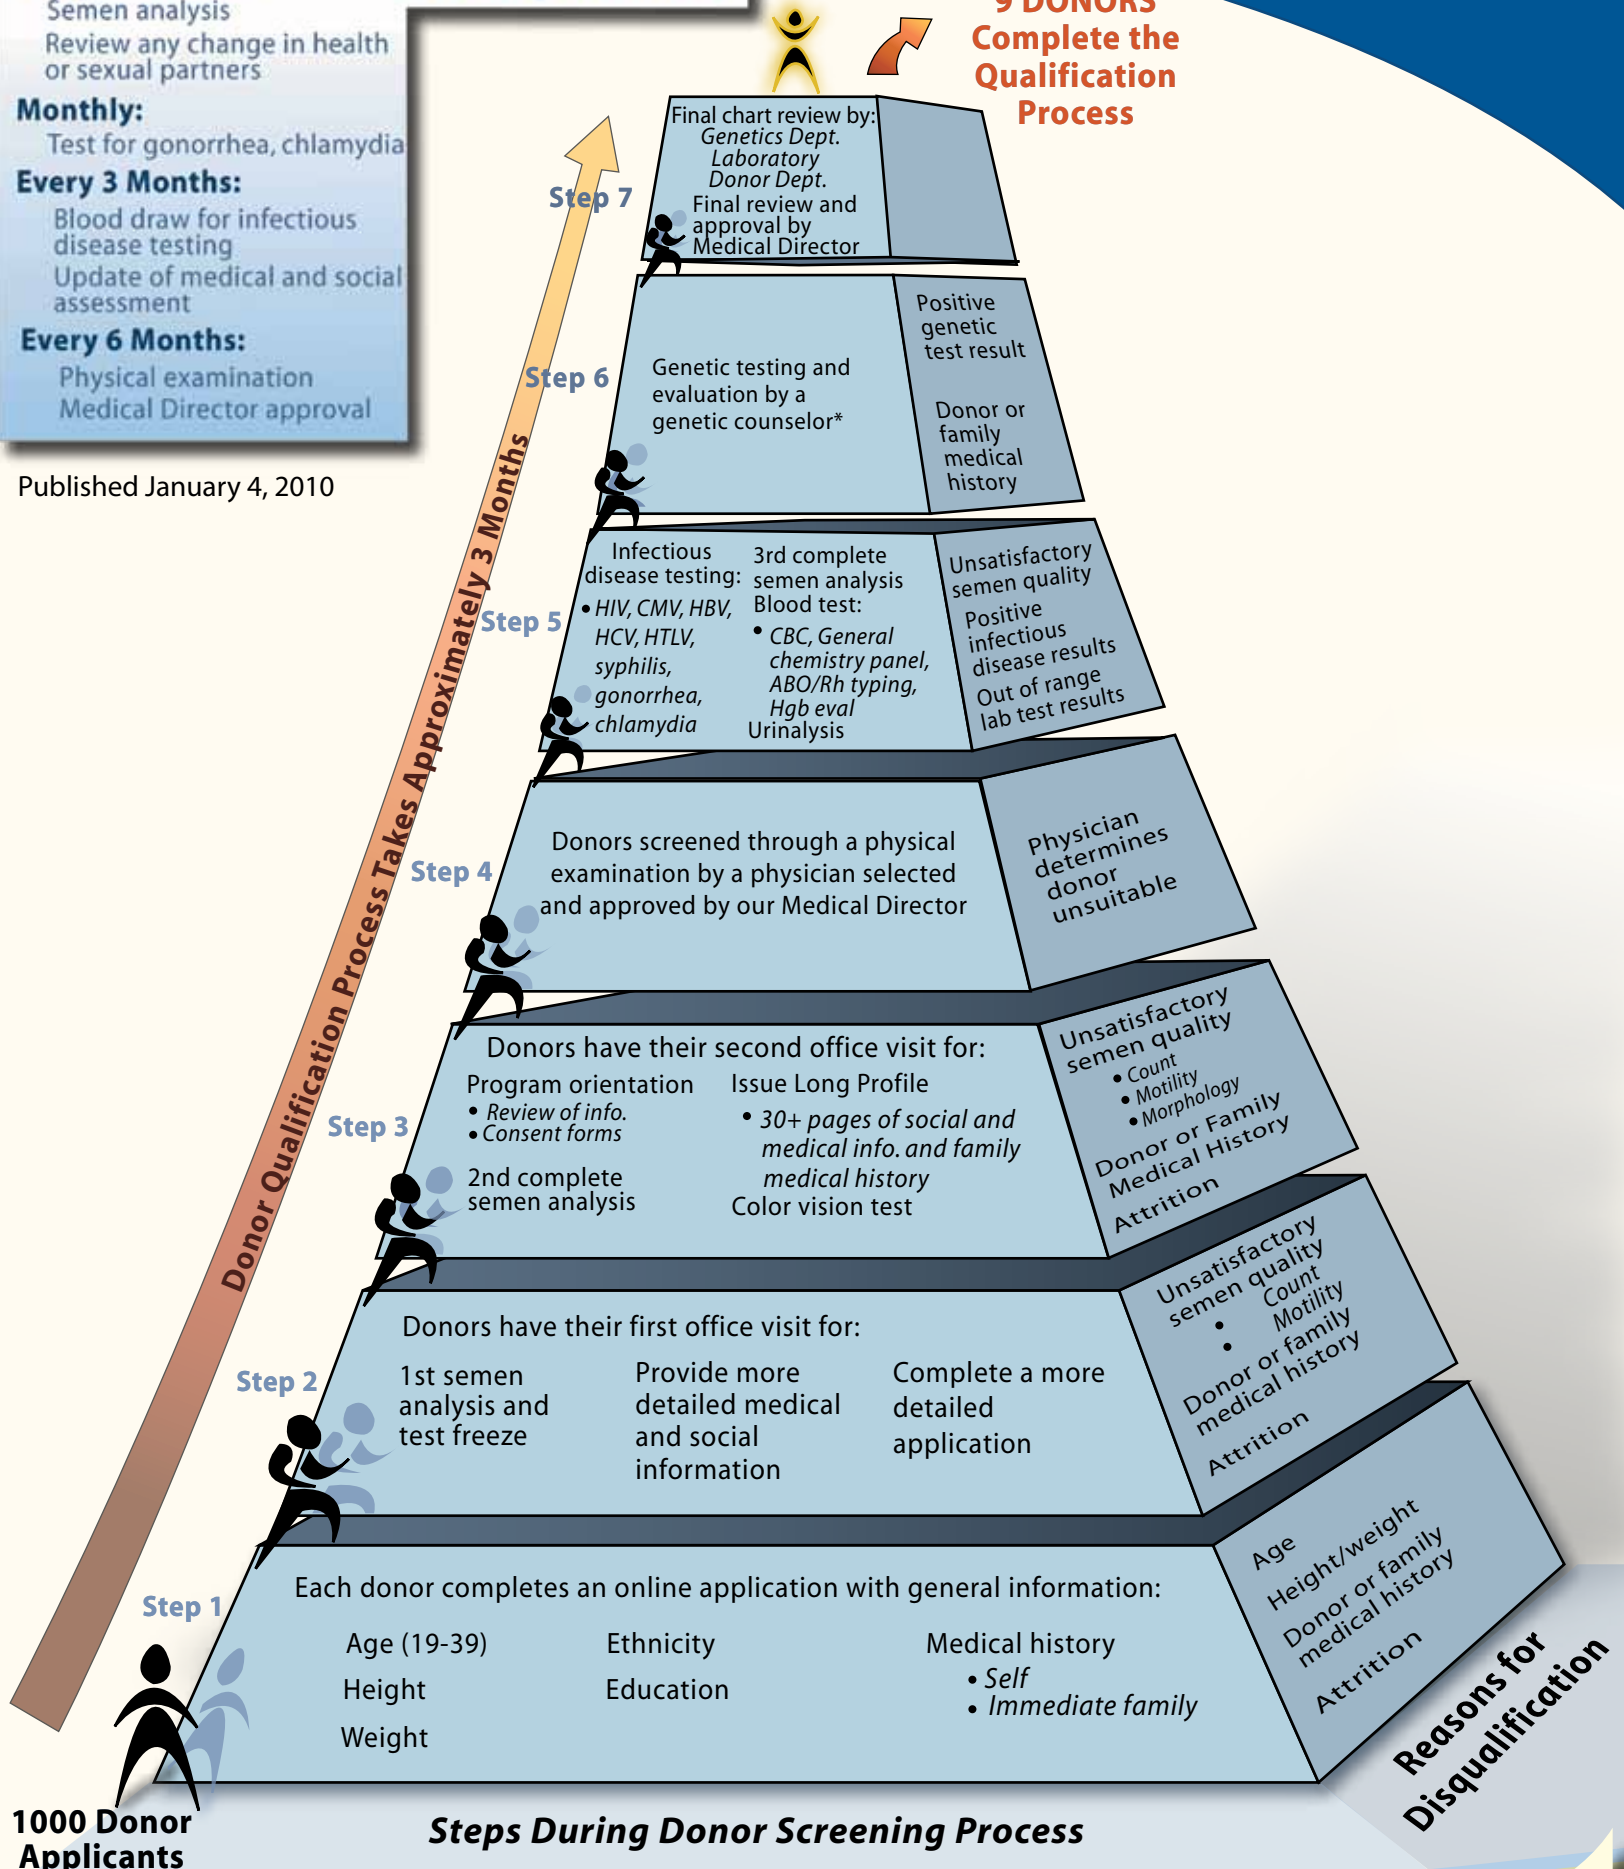

Physical examination
Medical Director approval

ONCE QUALIFIED:

9 DONORS
Complete the
Qualification
Process

Published January 4, 2010

*Testing performed on all donor applicants: chromosome analysis; carrier screening for cystic fibrosis, spinal muscular atrophy, sickle cell anemia and thalassemia. Testing performed on donor applicants with Jewish ancestry: carrier screening for Bloom syndrome, Canavan disease, familial dysautonomia, Fanconi anemia group C, Gaucher disease, mucopolidiosis type IV, Niemann-Pick disease type A and Tay-Sachs disease. Testing performed on donor applicants with French-Canadian ancestry: carrier screening for Tay-Sachs disease.

SELECTING YOUR DONOR

Why is CCB so picky about our donors? Choosing a sperm donor is one of the most important decisions you will ever make. Our high standards assure that every possible step has been taken to protect the health and well-being of you and your future baby.

Anonymous vs. Open Donor

Open Donors agree to one contact with any 18 year-old offspring. CCB will make every attempt to facilitate a meaningful contact. However, there may be situations where a contact between the donor and offspring cannot be established.

CCB will also contact Anonymous Donors on behalf of any 18 year-old offspring. Historically, Anonymous Donors have been very receptive to contact .

Visit www.cryobank.com for details on our services and to view FREE donor information including Short Profiles, Donor Essays, Staff Impressions, Donors of the Month Club, and Up Close and Personal donor summaries. You will also find additional extensive donor information available for purchase and download.

DONOR INFORMATION:

Long Profile

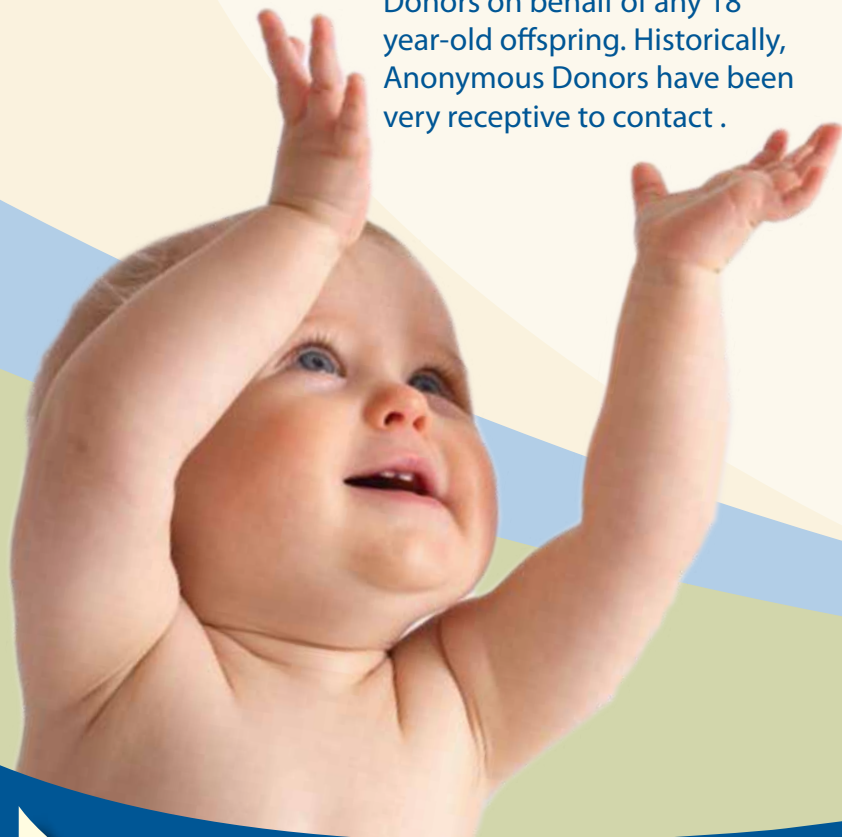

Our Long Profile contains a three-generation family medical history. We strongly encourage reviewing the long profile before making your final donor choice.

Audio Interview

Audio Interviews are available for most of our donors. The interview allows you to hear a donor's voice as he responds to specific questions. Many CCB parents save the audio interview for their child to hear in the future. You may download the Audio Interview or receive it on CD via mail.

Baby Photo

CCB offers a Baby Photo between the ages of 6 months and 4 years for most donors. Photos are available on our website for download or as 5 x 7 prints via mail. Please note that the quality of the baby photo varies depending on the original photo and may be in color or black and white.

Keirsey Temperament Sorter

The Keirsey Temperament Sorter is a widely used personality test available for many CCB donors. Clients receive a 10 page report, which may provide interesting insight into your own child's temperament someday.

Handwriting Analysis (Graphology)

Handwriting analysis, or graphology, is based in psychology and offers a unique perspective into an individual's emotional development, maturity, and core values.

Facial Features Report

The Facial Features Report includes illustrated examples of facial features in 10 key areas.

Donor Matching Consultations

California Cryobank has donor matching consultants to help with the selection process. This program involves matching a photograph provided by the client (usually a partner or family member) to donor photographs.

Donor Look-a-Likes

CCB Donor Look-a-Likes helps personalize your donor selection process by offering examples of celebrities that resemble each donor.

Combination Packages*

For your convenience, CCB offers Combination Packages which include multiple pieces of information for a single donor delivered via online download, standard mail or Federal Express (shipping fees apply).

Package #1:

- Long Profile
- Baby Photo
- Staff Impressions
- Donor Essay

Package #2:

- Long Profile
- Baby Photo
- Audio Interview
- Keirsey Temperament Sorter
- Facial Features Report
- Staff Impressions
- Donor Essay

* Packages may not be available for all donors

SPECIAL SERVICES

California Cryobank offers a number of useful services which can be tailored to meet your specific needs. You can count on CCB to help you through this unique process every step of the way. Need help finding a physician in your area? Contact our Client Services Team for a list of quality references. Having trouble selecting your donor? Trust our experienced Donor Matching Consultants to help you decide. Unsure about how many vials you should purchase? Check out our family planning programs. All of this is just the beginning. Visit cryobank.com or contact our Client Services Team at **866-9-CRYOBANK** for details on these special CCB services.

Genetic Consultations

California Cryobank has professional genetic counselors on staff to assist you with questions you may have regarding the personal or family medical history of a donor. You may contact the genetics department Monday through Friday from 9:00am to 5:00pm, Pacific Time by calling **877-7-GENETICS**.

Family Planning

Since the national averages range from 3-4 insemination cycles per successful pregnancy, we want to make sure your donor remains available to you. For those primarily focused on their family's immediate future, **Family Today** provides **1 YEAR of FREE** storage with the purchase of 6 or more vials. For those clients already thinking about additional children down the road, we offer **Family Tomorrow** which provides **3 YEARS of FREE** storage with the purchase of 12 or more vials.

CCB Sibling Registry

Join the growing number of families that are finding each other through our private sibling registry. Excited parents and children are sharing information and creating extended family ties around the world. This free service is exclusive to CCB clients.

866-9-CRYOBANK

Vial Buy Back

In order to keep every client's options as open as possible, CCB offers a Vial Buy Back which provides the opportunity to return unused vials for 50% of the original purchase price. Some restrictions apply.

Vial Exchange

Enjoy 100% flexibility in donor selection. CCB's Vial Exchange allows you to exchange your previously purchased vials for any other available donor. Some restrictions apply.

For Details visit CRYOBANK.com

CCB Cord Blood Advantage

Save over \$1000 on Premium Cord Blood Banking

Through our FamilyCord division, CCB clients reporting a successful pregnancy can bank their baby's cord blood for more than 50% off our normal price. Simply submit your Outcome of Insemination report and automatically receive your coupon from FamilyCord.

Cord blood banking is a valuable asset in protecting the future health of your child. Located in the umbilical cord and placenta, these unique cells are the building blocks of the blood system and may be used instead of a difficult and painful bone marrow transplant to treat certain anemias, leukemias, lymphomas and genetic disorders.

To date, there have been over 12,000 successful cord blood stem cell transplants primarily on infants and children, but ongoing research shows promise for additional applications including the treatment of diseases such as Alzheimer's and Parkinson's.

Parents should consider storing their child's cord blood especially if the family has a genetic predisposition for certain conditions or if both genetic links to the parents are not available, as in the case of using a sperm donor. For more information on cord blood banking, please call us at **(800) 490-2673**, or visit **familycord.com**.

GETTING STARTED

Register your personal account at cryobank.com to immediately begin saving your favorite donors and searches, ordering donor information, receiving special alerts, and more.

Make sure to have the **Authorization for Release of Semen (A1)** signed by your physician so that you may schedule your vial delivery. From the My Account page, click the Account Information link, then the Physician tab and follow the instructions to have the A1 faxed directly to your physician or download the form and bring to his/her office yourself.

Select your ideal donor from the industry's most comprehensive catalog using our donor search engine and consultation services.

(Don't forget your A1 form!)

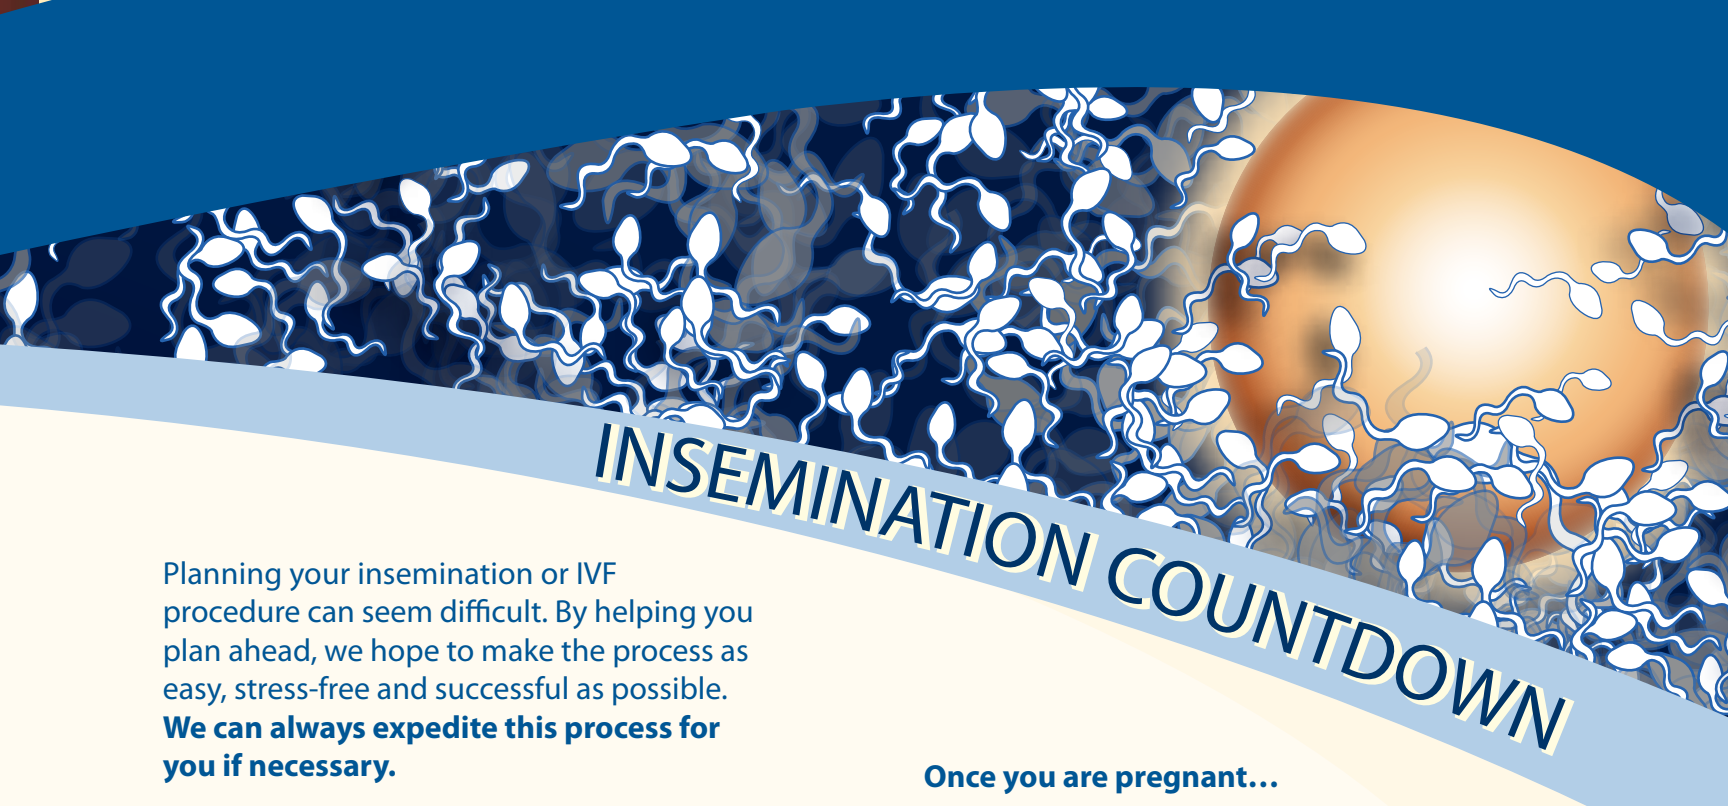

Purchase your vials online or by phone at 866-9-CRYOBANK. For online orders, digitally accept the Purchase/Storage Agreement upon your first purchase. For phone orders, fax a signed copy of the enclosed agreement prior to your first purchase. **Remember: You may purchase vials without the A1 but CCB must receive a physician-signed A1 before you are able to schedule a shipment.**

Schedule your FedEx **shipment** online (or by phone at 866-9-CRYOBANK). Plan for your vials to be delivered 24-48 hours prior to your insemination to ensure that they arrive on time.

Select a vial storage option. Plan for the future using our **Family Today & Family Tomorrow** free storage plans. Donors often sell out, so be sure to store extra vials while they are available.

INSEMINATION COUNTDOWN

Planning your insemination or IVF procedure can seem difficult. By helping you plan ahead, we hope to make the process as easy, stress-free and successful as possible.

We can always expedite this process for you if necessary.

5-6 Weeks Prior to insemination

- Open your CCB account
- Discuss with your physician:
 - Number of specimens to order
 - Vial type – ICI, IUI or A.R.T.
- Review our online Donor Catalog
- Download free Donor Information

4 Weeks Prior

- Narrow down donor choices via our Advanced Search
- Purchase additional Donor Information
- Call to schedule a Donor Matching or a Genetic Consultation (optional)

2-3 Weeks Prior

- Make your final donor selection.
- Order your vials (including enough for additional cycles and possible siblings) and schedule shipment (to arrive 2 days prior to your procedure).

1 Week Prior

- Perform ovulation test or see physician for ultrasound
- Call to place your order (if not already done)

Once you are pregnant...

Be sure to fill out an **Outcome of Insemination** Report through our website or over the phone with our Client Services Department so that we may contact you with any future medical/personal updates we receive on your donor. Reporting your pregnancy will also qualify you to take advantage of our exclusive CCB Cord Blood Advantage Program.

Important!

Donors regularly sell out without warning. Future availability of your donor can only be guaranteed by storing additional vials at the time of your purchase.

QUALITY GUARANTEE

California Cryobank is committed to providing donor semen specimens of the highest quality. California Cryobank evaluates each specimen prior to release to ensure that it meets our high quality standards. A post thaw analysis of sperm count, motility, and progression value is included with every donor specimen shipment.

Specimen Guarantee

Premium Vials	Motile Sperm (after thawing*)
Intracervical Insemination (ICI)	A minimum of 15 million
Intrauterine Insemination (IUI)	A minimum of 10 million
A.R.T Vials	Motile Sperm (after thawing*)
Intracervical Insemination (ICI)	8-14 million
Intrauterine Insemination (IUI)	5-9 million

*Variation in sperm counting can range 15-30% based on different laboratories, individual medical personnel and counting methods. It is possible that the values obtained by your laboratory will be less than our guaranteed minimum. This does not necessarily indicate that the specimen is substandard. The Cryobank makes allowances for analytical variation when determining if the specimen is eligible for credit.

Specimen Information

ICI, IUI, Premium, A.R.T.

CCB offers a variety of specimen types and preparations. Please consult your physician to determine which best meets your specific needs.

Specimen Preparations

- Intracervical Insemination (ICI) specimens (standard)
- Intrauterine Insemination (IUI) specimens (washed prior to freezing)

Specimen Categories

- Premium – Standard for traditional insemination procedures.
- Assisted Reproductive Technology (A.R.T.) - Designed for use in a variety of technologies such as in vitro fertilization (IVF), intracytoplasmic sperm injection (ICSI), GIFT, and ZIFT. Since fewer sperm are required for A.R.T. procedures, vials contain fewer total motile cells.

We like what our doctor had to say about how all other sperm banks had to come up to your standards. Everyone was great on the phone - patient, courteous, willing to answer my many questions. Thank you.

-CCB Client
